# TWICE

REPLASTIC BAGS

“We are an environmental  
driven company”

100% recycled  
bags & films

**TWICE INTERNATIONAL LLC** is an environmental driven company, using **ONLY** polymeric and raw materials derived exclusively from **RECYCLING**.

High quality standards are applied through out all the process to ensure the best possible product.

## The Process

- 1 Grinding
- 2 Washing
- 3 Separation
- 4 Extrusion

Everything starts from collecting 100% discharged plastic films and bags.

The collected material is then grinded, washed and separated, based of the different type of plastic materials. The plastic product is extruded to form the plastic pellets necessary for the production of all the **TWICE** lines of product.

## CONSTRUCTION INDUSTRY

Film on rolls with width from 39 to 157 inches  
and length from 33 to 164 ft and more.  
Thickness from 1.4 mil to 8 mil

Available in transparent, colored,  
matte – light blocking  
or light permeating

Resistant to UV light,  
steam and humidity

Specially designed for resistance  
during mechanical deployment

Construction film is available in  
different types: standard, folded once,  
folded twice, tubular, tubular double folded

## MANUFACTURING (industrial packaging)

### Products for the manufacturing industry include

Hoods for pallets wrapped in stretch film,  
Top Pallet – cover of pallets  
All kinds of bags  
Covering film in various dimensions

Single piece or pre-cut on rolls  
Folded standard, tubular or folded  
Cutting: central or lateral

Colors: transparent, colored, matte light  
blocking or light permeating

Resistant UV radiation from 6 to 18 months

Possibility of micro-perforation to avoid  
the creation of condensation and air bubbles.  
Accordingly to requests,  
it can be thermo retractable

## AGRICULTURE

### Agricultural (mulching film)

Thickness from 0.8 mil to 2.7 mil.

Colors: black (completely light blocking), double layer (black-white), UV protection from 6 to 18 months

Rolls width from 28 to 72 inches, length from 1,500 to 6,560 ft.

This specially designed film guarantees a perfect resistance during mechanical deployment

It is able to resist especially in warm and sunny areas

Perforated film is available

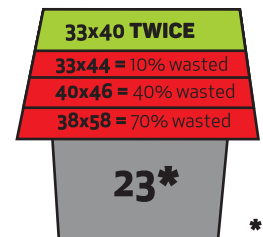

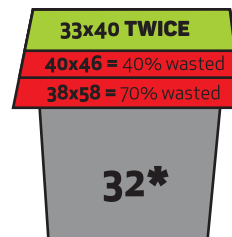

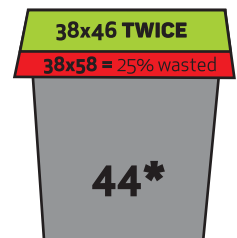

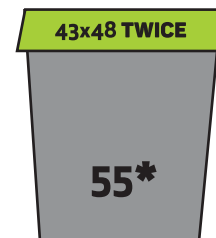

## CAN LINERS (home and industrial)

**TWICE** latest addition to its existing technology is a can liners packaging plant in pre-cut rolls able to deliver a high range of different specifications according to the most demanding client needs.

Thickness from 0.7 mil to 4 mil.

**TWICE** bags are designed to provide the most accurate fit, resulting in considerable cost savings, compared to standard leading industry bags.

Available in black, clear and assorted colors.

\*gal

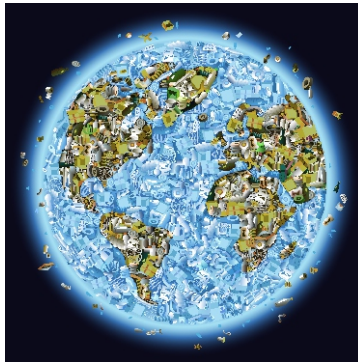

100% post consumer recycled.

Films, bags  
and packaging for the  
construction,  
agriculture, residential  
and hospitality industry.
